**FASEP is an innovative manufacturer of tire service tire service equipment and a global player in the automotive aftermarket providing a full range of Garage Equipment and Service Solutions.**

Since over 35 years FASEP strength is based on in-house design and manufacture of electronic wheel aligners and wheel balancers with a long experience and specific know-how. This specialization distinguishes FASEP for its unique products and technical solutions compared to most of other manufacturers.

Thanks to this specific know how, FASEP is a technology partner for many manufacturers of wheel balancers and wheel aligners worldwide, by means of know-how transfer and/or supply of high-tech core.
